Since 1993, Canada Diagnostic Centres has provided patients and healthcare providers with highly advanced diagnostic imaging of the body's most important organs and systems.

Location:

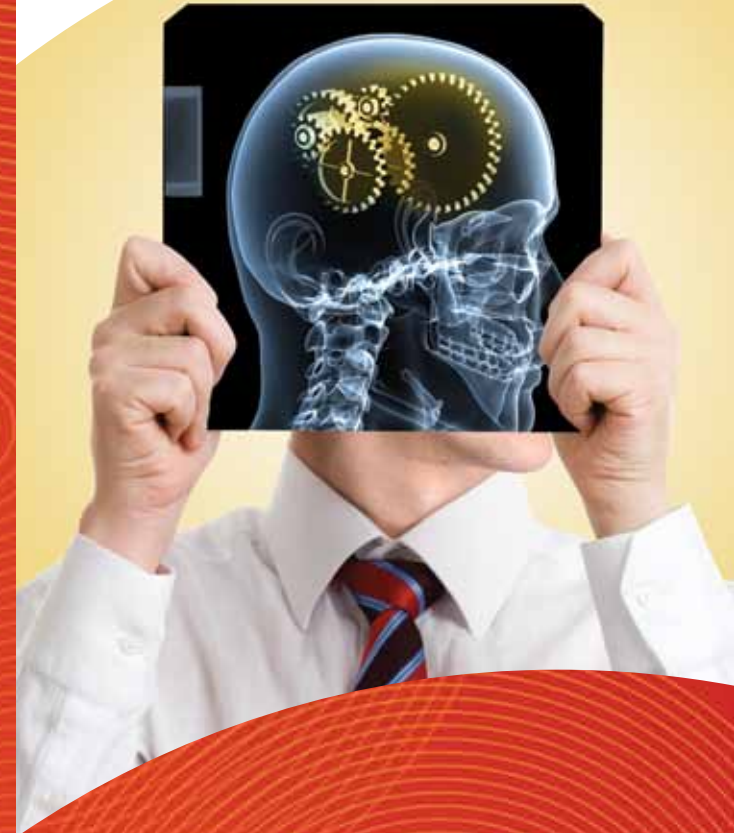

Chinook
1 – 6020 1A St SW
Calgary, AB T2H 0G3

Clinic hours:
Monday to Friday 8 am – 6 pm

Contact Information

General Bookings: 403.212.5855
MRI and CT Bookings: 403.212.5847
Toll Free: 1.877.420.4CDC (4232)
Fax: 403.253.4669
Web: www.canadadiagnostics.ca

Affiliated centres are located across Canada.

MRI

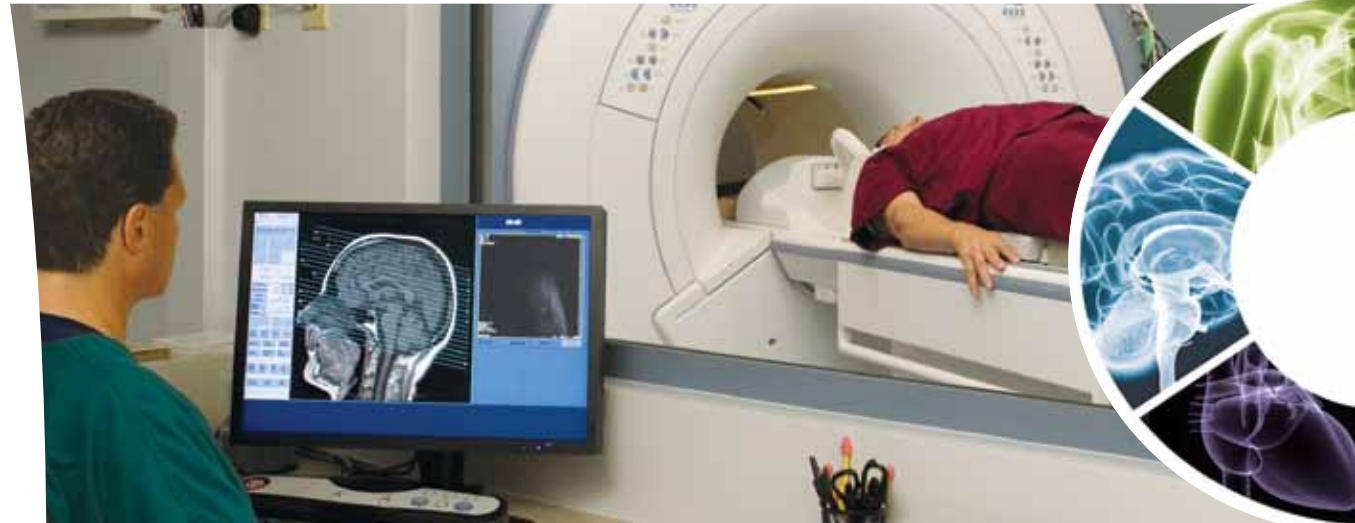

Magnetic Resonance Imaging

MRI Magnetic Resonance Imaging

Tips for understanding MRI

MRI's strong magnetic field and radio frequency enables visualization of the internal structure and function of the body from three different cross-sectional planes. This means that MRI can see internal structures at any angle and in greater detail than any other scanning technology.

Canada Diagnostic Centres also offers MRI arthrograms. This process uses contrast medium to further enhance the diagnostic images. Contrast is administered directly into a joint, not intravenously. The contrast allows the Radiologist to see finer details of scar tissues in post-operative patients, and tears in soft tissue and muscle. It may also enhance visualization of other pathology in the body. Your healthcare professional will help you determine the most appropriate scan for your needs.

MRI advantages

- MRI technology uses powerful magnetic energy instead of ionizing radiation.
- MRI examinations are non-invasive, pain-free and usually do not require any special preparations.
- MRI scans usually take 20 to 40 minutes to complete.
- MRI appointments are available with minimal wait times.

State of the art technology

The GE Signa Excite HD 1.5 Tesla imaging equipment used by Canada Diagnostic Centres is among the most medically advanced imaging technology available to physicians and patients today. This technology offers superior resolution and generates clear images that can allow for more accurate diagnosis.

At Canada Diagnostic Centres, we offer flexible appointment times and quick reporting back to your physician. We understand how important your health is and are committed to providing your referring physician with timely reports so that together, you can best manage your health. All MRI services require a medical referral.
