

# Anti-aging

Regaining a youthful look is no longer focused on just disguising problem areas. Dr. Frame and his team at the Anti-Aging Medical and Laser Clinic in Kerrisdale want to settle for nothing less than transforming your skin and your overall appearance.

Leading edge technologies such as Fraxel Restore® produce exciting results, restoring your skin's natural collagen while clearing away imperfections. The potential to erase scarring and pigmentation makes the Fraxel® laser an ideal treatment for acne scarring and discoloration.

Targeted facial areas can be replenished with dermal fillers to create smoother facial contours by restoring volume where it has been depleted, usually by gravity, weight loss or the natural aging process. Common treatment areas include the cheeks, beneath the eyes, around the mouth and along the jaw line.

Today's leading treatments including Restylane®, Perlane®, and Juvederm® incorporate lidocaine, making the procedure virtually pain free. Aside from the added comfort, results are enhanced as reduced swelling allows for better appraisal of work in progress and more precise application of the products being used.

It is now, in effect, a face sculpting experience. Cheeks droop with natural deterioration and wrinkling occurs. Botox® is not the only option and can be combined with artful application of fillers in the cheeks and jaw line to restore a youthful look. Applying these therapies under the eye diminishes the look of stress and anxiety associated with the passage of time

Each of Dr. Frame's patients in the Kerrisdale clinic is guided to informed choices based on a quality assessment and explanation of their options. Patients are not pressed into a pre-determined course of treatment, but are offered the most effective treatments for their particular needs and goals.

When not in Kerrisdale, Dr. Frame is at the Old Orchard Medical Clinic in Burnaby providing full service family practice and teaching medical students as Clinical Assistant Professor for UBC.

The Vancouver clinic's user-friendly website makes it easy to learn more about the latest developments and treatment options as well as Dr. Frame and the clinic staff. Learn how you can look and feel youthful and vigorous at [www.antiagingvancouver.com](http://www.antiagingvancouver.com).

**Dr. Frame** brings to his practice of aesthetic medicine a focus on total health and a passion for preventative, anti-aging, and regenerative medicine. Certified by the American Board of Anti-Aging Medicine since 2000, bioidentical hormone optimization adds to laser, injectable, and cosmeceutical treatments. Caring for his patients or taking time for personal growth and restoration, Dr. Frame is fully committed to living what he says.

For Dr. Frame, aging is not only a state of mind; it is a preventable condition. A youthful appearance has its foundation in overall health and vitality. Current biomedical technologies employ scientific, evidence-based regenerative medicine to improve both the length and quality of life. Based on thorough general diagnostic procedures including family history, an assessment of overall health and risk factors, and diagnostic imaging, the Anti-Aging Medical and Laser Clinic develops customized treatment programs including hormone optimization to protect your health and your skin now... and for the future. Reverse and prevent sun damage.
