

# Introducing HealthCare 365

**... an outstanding new concept in family oriented primary healthcare where our doctors have a single priority: their patients' well being.**

**Here's what makes Healthcare 365 so different from anything you've ever experienced:**

- All of your care is managed and coordinated. Follow up, checking-in and navigating the health system is our responsibility.
- You will have more time with our doctors, with longer appointments. You'll also be able to reach them by phone or email.
- You will have unlimited access to our clinics and you will never wait for appointments.
- An extensive network of credentialed specialists allows for timely referrals and options for treatment.
- Our doctors are available to provide round-the-clock medical support and advocacy in the health system – whether you are at the specialist, in the hospital or out of the country.
- All your medical records will be consolidated in a secure, online Electronic Medical Record. Available anytime, anywhere.

365

**It's surprisingly affordable.**  
Call Maureen at 416-642-9160 to book a Free, No-Obligation Consultation.

**Our doctors will spend more time with you and are accessible 24/7 for support.**

Our patient roster is deliberately kept much smaller than a public practice's, so our doctors have the time to spend with patients without creating crowded waiting rooms. They conduct truly thorough medical evaluations and take time to investigate all issues, research treatment options, stay informed on medical best practices and, most importantly, answer questions from the patient. They will even arrange second opinions through our in-house Medical Advisory Panel. Yes, they have time to listen and discuss and not only rely on prescribing medication.

Our system is configured so that it is easy to get appointments

and physicals. Our Care Coordinators will co-operate with any outside specialists and hospitals to move things forward and advocate for patients.

HealthCare 365 recognizes that your health is a 'round-the-clock' concern. Our After-hours Nurse Line ensures that our caregivers can monitor and check on patients, as well as take emergency calls and contact our doctors outside clinic hours.
