## ***MRI AT THE SPEED OF LIFE***

### ***Advantages***

MRI is ideal for, but not limited to:

- Diagnosing Multiple Sclerosis (MS).
- Diagnosing tumours of the pituitary gland or brain.
- Diagnosing infections in the brain, spine or joints.
- Visualizing torn ligaments in the joints.
- Diagnosing tendonitis.
- Evaluating masses in the soft tissues of the body.
- Evaluating bone tumours, cysts and bulging or herniated discs in the spine.

### ***Disadvantages***

You cannot have an MRI if you have a pacemaker. Some orthopedic hardware may interfere with the images. MRI machines are a little noisy but we will give you earplugs. If you are severely claustrophobic, you may need a mild sedative from your physician.
